

Bullet Points

- It is bad practice to have any more than six bullet points on each of your slides.
- The more slides you add to a page the more clustered you will find your page becoming.
- At this point your work ceases to be well spaced out,
- It becomes very difficult and off putting to read,
- It will look wordy, and the font size will shrink so that it may be illegible.
- Your audience will not thank you and are likely to become irritated.
- Consider that this page is clustered with only seven bullet points!
