James

## Case Studies: Lessons Learned

- Verification and Validation are difficult
- Performance competes with other goals
- Use of higher-level languages is low
- Developers prefer command line over IDE
- Agile development methods are useful
- Primary language does not change
- External software is risky
- Multi-disciplinary teams are important
- Success/failure depends keeping customers/sponsors satisfied

# Failure Modes

Level of engagement

"Why wasn't I informed?"

Innovation versus stability

Infrastructure dependencies

Sweeping changes

Narrative documentation

Overpromise, underdeliver

Underpromise, overdeliver

# Software is...

...a tool to  
enable research

...the research

Upfront

*Developed*

Continuously

Retrospectively

*Becomes an output*

Continuously
